Wall Fixing Options

Adjustable Wall Profiles (Supplied as standard)

Offering 12mm of adjustment (+/- 6mm each side), this option is fitter-friendly and can compensate for out of true walls. AQATA's Survey & Installation service is not required when choosing this wall fixing option.

Slimline Wall Channel

This option has no adjustment and therefore walls, floors and shower trays must be entirely level and true to ensure accurate installation. AQATA's Survey & Installation service is optional when choosing this wall fixing option, but recommended for a worry-free solution.

Bracket Only

Featuring mirror polished finish brackets for a totally frameless look. Wall and bath rim must be entirely level and true. Due to the nature of this fixing option, AQATA's Survey & Installation service is required. Additional charges may apply - see page 122 for more details.

Please state wall fixing option when ordering.
